

Gel coats are our *only* business. That's why they have to be the best.

We are your only source for low-HAP 100% NPG Isophthalic gel coats, and ours work the first time, every time.

*David Higgins,
National Sales Manager*

We have enough capacity to fill all of North America's gel coat needs, and then some.

*Lori Burgin,
Inventory Control
Technician*

Ours is the only fully-automated gel coat manufacturing plant in the world.

*Richard Higgins,
President*

We pioneered Processability*—gel coats that perform beautifully in your plant environment.

*Ted Hilton,
Operations Manager*

At HK, quality control is the responsibility of our lab.

*Jerry Killian,
Laboratory Manager*

We have the highest R&D to manufacturing ratio in the industry.

*Jan Higgins,
Co-Founder*

** Processability means top performance in your shop and in the field. No more pre-released parts, profile distortion, pitting, sticky backsides and other common gel coat problems that waste your time and money.*

America's Leading Gel Coat Company

Gel Coats: Marine, FRP, Tooling, Cultured Marble/Sanitary Ware
